## Just another day at

This past Tuesday Leah Mayhall went into a patient's room to give him an IM pneumonia injection. Leah had never given an IM injection and none of us had either so we accompanied her into the room. The man immediately starting grilling her: "You're going to do what?" "Do you even know what's in that needle?" Is it going to hurt?" "Are you really sure you know what you're doing?". His next question was, "Have you ever done this before?". Leah replied, "Yes." He then replied, "On a watermelon?? Because that doesn't count!" She finally got all of his questions answered and prepared to inject the needle. As soon as she did, he screamed bloody murder. It was the funniest thing! But Leah kept her cool and got the medicine in. In the end, it turns out Mrs. Woodham asked the man to interrogate Leah and to scream when she put the needle in!
